

1. With the Epiduo Reminder, I added a frequency phase but I cannot choose when this next phase starts, I chose when the first repeat would stop but now the reminder is just set at every 2 nights but i wanna start with every 3 nights till 27th June 2026.
2. Epiduo Reminder - I cant find the option to remind me/ask me if i wanted to change my reminder frequency yet. Thats if i dont know when i want the frequency phase i just made to finish, and increase or decrease.
3. Add a MacBook control centre feature to add a reminder

4. The keyboard on iPhone stays on screen when attempting to pick the date and time, when adding or editing a reminder.
5. On both apps, it does not let me edit reminders I have made. It doesn't let me edit the title
6. Why is the Bicycle Parking reminder so high up in upcoming reminders? It's due in 2027, i know its set as High priority but still doesnt make sense.
7. Let me choose as many early reminders as I want, not just one.
8. Add more options for early reminders - maybe even 1 month earlier in some cases - let it be customisable how early
